

Link to their website: <http://u GARD Pro Not Registered> There's a new version of the glu3D fluid motion simulator for 3dsMax that brings it up to date with 3dsMax2012 and adds in CUDA computation for improved performance.

It speeds up intensive computations that glu3D performs to calculate particle fluid dynamics.. Animated fluid scenes with more quality and level of detail You can download their free Demo version at their site, or buy it for \$760.. This is the legal free way of downloading 3ds Max 2012 Edition right from their website, no illegal websites or virus cracks.. With this glu3D edition it is possible to simulate faster and with more particles than before; it is possible to simulate your scene more times; it is almost interactive.
